Sir:

NOTICE OF RELATED LITIGATION

Through its legal representative, the Patent Owner wishes to notify the U.S. Patent and Trademark Office that U.S. Patent 5,750,338 (the '338 patent) entitled "Target and Background Capture Methods with Amplification for Affinity Assays," filed for reissue on March 8, 2000, is involved in litigation. Nonetheless, the Patent Owner expressly requests that the reissue application be examined at this time. Moreover, on March 9, 2000, the Patent Owner filed a motion to stay the litigation pending resolution of reissue proceedings. A copy of this motion is attached. As soon as the Patent Owner receives a decision on this motion, the Patent Owner will notify the Patent Office.

5 Attorneys for Plaintiff  
Gen-Probe Incorporated

8 UNITED STATES DISTRICT COURT  
9 SOUTHERN DISTRICT OF CALIFORNIA

10  
11 GEN-PROBE INCORPORATED,  
12 Plaintiff,  
13 v.  
14 VYSIS, INC.,  
15 Defendant.

No. '99CV 2668H AJB  
COMPLAINT FOR DECLARATORY RELIEF  
DEMAND FOR JURY TRIAL

16  
17 PLAINTIFF GEN-PROBE ALLEGES:

18 INTRODUCTION

19 1. This action concerns the invalidity and non-infringement of United States Patent  
20 No. 5,750,338 ("the '338 patent"). As set forth below, plaintiff Gen-Probe Incorporated ("Gen-  
21 Probe") asks this court to declare the '338 patent invalid and further to declare that Gen-Probe's  
22 current and anticipated activities do not infringe any valid claim of the '338 patent.

23 THE PARTIES

24 2. Gen-Probe was founded in San Diego in 1984 as a small "start up" company,  
25 seeking to develop products based on the discoveries of a local research scientist. Over time, Gen-  
26 Probe became one of the largest biotechnology firms in San Diego. Gen-Probe now maintains its

27 ///

28 ///

1 principal offices and research facilities at 10210 Genetic Center Drive in San Diego, where it  
2 employs over 500 scientists and staff. Gen-Probe is organized under the laws of the State of  
3 Delaware.

4 3. Gen-Probe is informed and believes that defendant Vysis, Inc. (hereinafter "Vysis"  
5 or "the defendant") is a corporation organized and incorporated under the laws of the State of  
6 Delaware. Gen-Probe is further informed and believes that Vysis maintains its principal place of  
7 business in Downers Grove, Illinois and that it is controlled by BP Amoco, Inc.

#### 8 JURISDICTION AND VENUE

9 4. Counts One and Two of this Complaint seek declaratory relief under the  
10 Declaratory Judgment Act, Title 28, United States Code, Sections 2201 and 2202. This Court has  
11 subject matter jurisdiction of the claims asserted thereunder by reason of Title 28, United States  
12 Code, Sections 1331 and 1338(a).

13 5. Venue is proper in this District under Title 28, United States Code, Sections  
14 1391(a), 1391(b) and 1400(b).

#### 15 BACKGROUND

16 6. Living cells store genetic information in molecules of nucleic acid known as DNA.  
17 These molecules consist of long, thin, chain-like strands which, in turn, are usually found in the  
18 form of two tightly bound, complementary chains. DNA molecules retain their genetic information  
19 in the form of a genetic code. The information in the DNA determines the life processes of each  
20 organism. The information in the DNA is used to make related nucleic acid molecules called RNA  
21 that cells use to manufacture proteins.

22 7. Through the work of its scientists and staff, Gen-Probe has developed and continues  
23 to develop diagnostic tests that seek out the DNA or RNA of the infectious organisms. These types  
24 of tests are generally referred to as "genetic probes" or "nucleic acid tests" ("NAT"). Gen-Probe  
25 now markets DNA probe products that test for a wide range of microorganisms that cause  
26 tuberculosis, strep throat, pneumonia, fungal infections and sexually transmitted diseases. Through  
27 the efforts of its scientists and staff, Gen-Probe has emerged as the recognized world leader in the  
28 development, manufacture and commercialization of diagnostic products based on its patented

1 genetic probe technology. Gen-Probe has received over 40 FDA clearances and approvals for  
2 genetic probe tests to detect a wide range of microorganisms, including Chlamydia, Mycobacterium  
3 tuberculosis and Neisseria gonorrhoeae.

4 8. Many human diseases are caused by bacterial or viral agents that invade living  
5 cells. Historically, the presence of these bacterial or viral agents was detected directly by time-  
6 consuming methods such as culture or indirectly through the detection of antibodies.  
7 Unfortunately, it takes time, sometimes weeks or months, to grow organisms in culture, and it  
8 usually takes months for the body to manufacture antibodies in sufficient amounts to reveal the  
9 presence of infectious agents. Consequently, these methods do not lend themselves to early  
10 detection of infection. NAT addresses this problem.

11 9. Among the disease detection technologies recently applied by Gen-Probe is its  
12 patented nucleic acid technology known as "Transcription-Mediated Amplification" ("TMA"). This  
13 technology enables Gen-Probe's NAT products to detect extraordinarily small quantities of the  
14 nucleic acids of infectious agents.

15 10. In September 1996, Gen-Probe received a \$7.7 million grant from the National  
16 Institutes of Health to develop TMA-based nucleic acid tests to be used in screening donated blood  
17 for and human immunodeficiency virus (HIV), the causative agent of AIDS, and hepatitis C virus  
18 (HCV), which causes a severe form of hepatitis.

19 11. At the time of the NIH grant to Gen-Probe, donated blood was principally tested by  
20 procedures that detected the presence of antibodies to the viruses being screened. Due to the time it  
21 takes for the body to make antibodies after initial infection, donated blood may test negative for  
22 antibodies, yet still carry infectious viruses. This delay between the time of actual infection and the  
23 time that antibodies can first be detected is often known as the "window period." Reduction of this  
24 "window period" was a significant concern of the United States government and the primary focus  
25 of the grant to Gen-Probe to develop NAT diagnostics for use in blood screening.

26 12. In fulfilling its obligations under the grant, Gen-Probe developed NAT tests to  
27 detect the DNA of HIV and hepatitis C in blood. Through the use of its NAT test, Gen-Probe  
28 believes that researchers and medical personnel may rapidly and *directly* detect the presence of

1 genetic material of viruses like HIV and HCV more accurately and without the complications and  
2 delay associated with conventional *indirect* tests. As such, Gen-Probe believes that its new test  
3 may significantly reduce the "window period" for detection of these extremely harmful viral agents  
4 and resulting diseases.

5 13. Final development of the NAT tests for blood screening in the United States is now  
6 taking place in testing conducted by the American Red Cross, America's Blood Centers, and others.  
7 ("A Purity Quest; Local Biotech's Ultra-Sensitive Blood Screening Could Cut Risk of AIDS,  
8 Hepatitis," *San Diego Union*, March 25, 1999, page C-1.) Use of the tests in the United States is  
9 made pursuant to an Investigational New Drug Application filed with the United States Food and  
10 Drug Administration. In blood tested by the American Red Cross, Gen-Probe's products have  
11 detected hepatitis C and HIV which escaped detection by prior methods. ("New Blood Screening  
12 Finds Virus Others Missed; Experimental Test Turns Up Hepatitis C In Donated Blood," *San Diego*  
13 *Union*, April 2, 1999, page B-2.)

14 14. On September 21, 1999, the French Ministry of Health approved the sale of the  
15 Gen-Probe blood screening tests in France. Gen-Probe anticipates approval of its tests for us in  
16 Australia in early 2000.

17 15. Gen-Probe has entered into an agreement with Chiron Corporation ("Chiron") of  
18 Emeryville, California, with respect to the development, manufacture, and distribution of blood  
19 screening products. Gen-Probe is also a party to an agreement with Bayer Corporation ("Bayer") of  
20 Emeryville, California with respect to the development, manufacture, and distribution of clinical  
21 diagnostic products for the detection of HIV and hepatitis C, among other pathogens.

22 16. Gen-Probe anticipates that clinical trials in the United States of its HIV/HCV tests  
23 for use in blood screening and in clinical diagnostics will commence in the first part of 2000. Gen-  
24 Probe anticipates the conclusion of those clinical trials, and the initiation of commercial sales in the  
25 United States of kits containing its HIV/HCV blood screening test, during 2000.

26 17. All of the Gen-Probe products are manufactured in San Diego, California.

27 ///

28 ///

1 THE '338 PATENT

2 18. Gen-Probe is informed and believes that on or about May 12, 1998, the United  
3 States Patent and Trademark Office issued United States Patent No. 5,750,338 ("the '338 patent")  
4 based upon Patent Application No. 238,080 filed on May 3, 1994.

5 19. Gen-Probe is informed and believes that defendant Vysis claims to be the owner, by  
6 assignment, of the entire right, title and interest of the '338 patent. The claims of the '338 patent  
7 purport to relate to assays and probes for polynucleotide molecules such as DNA and RNA.

8 20. In early 1999, Vysis informed Gen-Probe that it believed that the '338 patent  
9 applied to Gen-Probe's NAT blood screening tests for HIV and HCV. Following further  
10 discussions and to avoid any complications in Gen-Probe's plans for commercial deployment of its  
11 NAT test kits, as of June 22, 1999 Gen-Probe obtained a license from Vysis under the '338 patent.  
12 Gen-Probe also obtained options to licenses for its relationships with Chiron and Bayer. Under the  
13 terms of the licenses, Vysis requires Gen-Probe (and its allied parties if the options are exercised) to  
14 make significant financial payments to Vysis as royalties on the sale of any product covered by  
15 valid claims of the '338 patent.

16 21. Notwithstanding the existence of the licenses, and as further alleged herein, Gen-  
17 Probe believes that the '338 patent is invalid in all material respects. Furthermore, Gen-Probe  
18 believes that its NAT blood screening tests do not infringe any valid claim of the '338 patent. As  
19 such, Gen-Probe disagrees with Vysis' contention that the claims of the '338 patent "apply" to Gen-  
20 Probe's activities.

21 22. Gen-Probe is informed and believes that the defendant disputes and disagrees with  
22 Gen-Probe's contentions concerning the non-infringing nature of its present and planned activities  
23 and products and the invalidity of the '338 patent, as expressed above and detailed in the following  
24 paragraphs of the complaint. Furthermore, based upon a long history of litigation between Gen-  
25 Probe and Vysis' and its affiliates, Gen-Probe reasonably anticipates that should it fail to pay  
26 royalties pursuant to the Vysis license, Vysis will aggressively attempt to enforce its perceived  
27 rights under the '338 patent by terminating the license and through litigation against Gen-Probe, its  
28 allied parties, and customers.

1 23. An actual case or controversy exists between Gen-Probe and Vysis concerning  
2 validity and infringement of the '338 patent.

3 COUNT ONE

4 NON-INFRINGEMENT OF THE '338 PATENT

5 24. Gen-Probe repeats, repleads and incorporates herein the allegations of paragraphs 1  
6 through 23 of this complaint.

7 25. Gen-Probe's NAT test kits for use in detecting HCV and HIV in the Nation's blood  
8 supply do not and will not infringe the '338 patent.

9 COUNT TWO

10 INVALIDITY OF THE '338 PATENT

11 26. Gen-Probe repeats, repleads and incorporates herein the allegations of paragraphs 1  
12 through 23 of this complaint.

13 27. The '338 patent is invalid by reason of one or more provisions of Title 35 of the  
14 United States Code.

15 WHEREFORE, Gen-Probe prays as follows:

- 16 1. For a declaration that:
- 17 a. Gen-Probe's products do not and will not infringe the '338 patent; and
  - 18 b. The '338 patent is invalid.
- 19 2. For a preliminary and permanent injunction enjoining and restraining defendant, its  
20 respective officers, agents, servants, employees and attorneys, and all persons acting in concert  
21 with them, and each of them:
- 22 a. From making any claims to any person or entity that Gen-Probe's products  
23 infringe the '338 patent;
  - 24 b. From interfering with, or threatening to interfere with the manufacture, sale,  
25 license, or use of Gen-Probe's products by Gen-Probe, its allied parties, distributors, customers,  
26 licensees, successors or assigns, and others; and

27 ///  
28 ///

1 c. From instituting or prosecuting any lawsuit or proceeding, placing in issue  
2 the right of Gen-Probe, its allied parties, distributors, customers, licensees, successors or assigns,  
3 and others to make, use or sell Gen-Probe's products.

4 3. For recovery of Gen-Probe's attorneys' fees and costs of suit incurred herein; and

5 4. For such other and further relief as the Court may deem just and proper.

CLERK U.S. DISTRICT COURT  
SOUTHERN DISTRICT OF CALIFORNIA

Attorneys for Plaintiff  
Gen-Probe Incorporated

BY: DEPUTY

UNITED STATES DISTRICT COURT  
SOUTHERN DISTRICT OF CALIFORNIA

GEN-PROBE INCORPORATED,

No. 99CV2668H AJB

Plaintiff,

**FIRST AMENDED COMPLAINT FOR  
DECLARATORY RELIEF AND UNFAIR  
COMPETITION**

v.

VYSIS, INC.,

Defendant.

PLAINTIFF GEN-PROBE ALLEGES:

INTRODUCTION

1. This action concerns the nature and scope of any obligation of plaintiff Gen-Probe Incorporated ("Gen-Probe") to make royalty payments to defendant Vysis, Inc. ("Vysis") pursuant to a patent license agreement between the parties ("the License") in light of the invalidity and non-infringement of United States Patent No. 5,750,338 ("the '338 patent") that is a subject of that License. As set forth below, Gen-Probe asks this court to declare the '338 patent invalid and further to declare that Gen-Probe's current and anticipated activities do not infringe any valid claims of the '338 patent. As a corollary to those declarations, Gen-Probe also asks this Court to declare its rights and obligations under the terms of the parties' License. Finally, Gen-Probe also seeks relief from Vysis' continuing acts of wrongful and unfair conduct with respect to the '338 patent.

0020720" SUBCCE560

**THE PARTIES**

2. Gen-Probe was founded in San Diego in 1984 as a small "start up" company, seeking to develop products based on the discoveries of a local research scientist. Over time, Gen-Probe became one of the largest biotechnology firms in San Diego. Gen-Probe now maintains its principal offices and research facilities at 10210 Genetic Center Drive in San Diego, where it employs over 500 scientists and staff. Gen-Probe is organized under the laws of the State of Delaware.

3. Gen-Probe is informed and believes that defendant Vysis, Inc. (hereinafter "Vysis" or "the defendant") is a corporation organized and incorporated under the laws of the State of Delaware. Gen-Probe is further informed and believes that Vysis maintains its principal place of business in Downers Grove, Illinois and that it is controlled by BP Amoco, Inc.

**JURISDICTION AND VENUE**

4. Counts One and Two of this Complaint seek declaratory relief under the Declaratory Judgment Act, Title 28, United States Code, Sections 2201 and 2202. This Court has subject matter jurisdiction of the claims asserted thereunder by reason of Title 28, United States Code, Sections 1331, 1338(a), 1338(b) and 1367.

5. Venue is proper in this District under Title 28, United States Code, Sections 1391(b) and 1400(b).

**BACKGROUND**

6. Living cells store genetic information in molecules of nucleic acid known as DNA. These molecules consist of long, thin, chain-like strands which, in turn, are usually found in the form of two tightly bound, complementary chains. DNA molecules retain their genetic information in the form of a genetic code. The information in the DNA determines the life processes of each organism. The information in the DNA is used to make related nucleic acid molecules called RNA that cells use to manufacture proteins.

7. Through the work of its scientists and staff, Gen-Probe has developed and continues to develop diagnostic tests that seek out the DNA or RNA of the infectious organisms. These types of tests are generally referred to as "genetic probes" or "nucleic acid tests" ("NAT"). Gen-Probe

00301009055550

1 now markets DNA probe products that test for a wide range of microorganisms that cause  
2 tuberculosis, strep throat, pneumonia, fungal infections and sexually transmitted diseases. Through  
3 the efforts of its scientists and staff, Gen-Probe has emerged as the recognized world leader in the  
4 development, manufacture and commercialization of diagnostic products based on its patented  
5 genetic probe technology. Gen-Probe has received over 40 FDA clearances and approvals for  
6 genetic probe tests to detect a wide range of microorganisms, including Chlamydia trachomatis,  
7 Mycobacterium tuberculosis and Neisseria gonorrhoeae.

8 8. Many human diseases are caused by bacterial or viral agents that invade living  
9 cells. Historically, the presence of these bacterial or viral agents was detected directly by time-  
10 consuming methods such as culture or indirectly through the detection of antibodies.  
11 Unfortunately, it takes time, sometimes weeks or months, to grow organisms in culture, and it  
12 usually takes months for the body to manufacture antibodies in sufficient amounts to reveal the  
13 presence of infectious agents. Consequently, these methods do not lend themselves to early  
14 detection of infection. NAT addresses this problem.

15 9. Among the disease detection technologies recently applied by Gen-Probe is its  
16 patented nucleic acid technology known as "Transcription-Mediated Amplification" ("TMA").  
17 This technology enables Gen-Probe's NAT products to detect extraordinarily small quantities of the  
18 nucleic acids of infectious agents.

19 10. In September 1996, Gen-Probe received a \$7.7 million grant from the National  
20 Institutes of Health to develop TMA-based nucleic acid tests to be used in screening donated blood  
21 for and human immunodeficiency virus (HIV), the causative agent of AIDS, and hepatitis C virus  
22 (HCV), which causes a severe form of hepatitis.

23 11. At the time of the NIH grant to Gen-Probe, donated blood was principally tested by  
24 procedures that detected the presence of antibodies to the viruses being screened. Due to the time it  
25 takes for the body to make antibodies after initial infection, donated blood may test negative for  
26 antibodies, yet still carry infectious viruses. This delay between the time of actual infection and the  
27 time that antibodies can first be detected is often known as the "window period." Reduction of this  
28 "window period" was a significant concern of the United States government and the primary focus

1 of the grant to Gen-Probe to develop NAT diagnostics for use in blood screening.

2 12. In fulfilling its obligations under the grant, Gen-Probe developed NAT tests to  
3 detect the DNA of HIV and hepatitis C in blood. Through the use of its NAT test, Gen-Probe  
4 believes that researchers and medical personnel may rapidly and *directly* detect the presence of  
5 genetic material of viruses like HIV and HCV more accurately and without the complications and  
6 delay associated with conventional *indirect* tests. As such, Gen-Probe believes that its new test  
7 may significantly reduce the "window period" for detection of these extremely harmful viral agents  
8 and resulting diseases.

9 13. Final development of the NAT tests for blood screening in the United States is now  
10 taking place in testing conducted by the American Red Cross, America's Blood Centers, and others.  
11 ("A Purity Quest; Local Biotech's Ultra-Sensitive Blood Screening Could Cut Risk of AIDS,  
12 Hepatitis," *San Diego Union*, March 25, 1999, page C-1.) Use of the tests in the United States is  
13 made pursuant to an Investigational New Drug Application filed with the United States Food and  
14 Drug Administration. In blood tested by the American Red Cross, Gen-Probe's products have  
15 detected hepatitis C and HIV which escaped detection by prior methods. ("New Blood Screening  
16 Finds Virus Others Missed; Experimental Test Turns Up Hepatitis C In Donated Blood," *San Diego*  
17 *Union*, April 2, 1999, page B-2.)

18 14. On September 21, 1999, the French Ministry of Health approved the sale of the  
19 Gen-Probe blood screening tests in France. Gen-Probe anticipates approval of its tests for us in  
20 Australia in early 2000.

21 15. Gen-Probe has entered into an agreement with Chiron Corporation ("Chiron") of  
22 Emeryville, California, with respect to the development, manufacture, and distribution of blood  
23 screening products. Gen-Probe is also a party to an agreement with Bayer Corporation ("Bayer") of  
24 Emeryville, California with respect to the development, manufacture, and distribution of clinical  
25 diagnostic products for the detection of HIV and hepatitis C, among other pathogens.

26 16. Gen-Probe anticipates that additional clinical trials in the United States of its  
27 HIV/HCV tests for use in blood screening and in clinical diagnostics will commence in the first part  
28 of 2000. Gen-Probe anticipates the conclusion of those clinical trials, and the initiation of

1 commercial sales in the United States of kits containing its HIV/HCV blood screening test, during  
2 2000.

3 17. All of the Gen-Probe products are manufactured in San Diego, California.

4 THE '338 PATENT

5 18. Gen-Probe is informed and believes that on or about May 12, 1998, the United  
6 States Patent and Trademark Office issued United States Patent No. 5,750,338 ("the '338 patent")  
7 based upon Patent Application No. 238,080 filed on May 3, 1994.

8 19. Gen-Probe is informed and believes that defendant Vysis claims to be the owner, by  
9 assignment, of the entire right, title and interest of the '338 patent. The claims of the '338 patent  
10 purport to relate to assays and probes for polynucleotide molecules such as DNA and RNA.

11 20. In early 1999, Vysis informed Gen-Probe that it believed that the '338 patent  
12 "applied" to Gen-Probe's NAT blood screening tests for HIV and HCV. Following further  
13 discussions and to avoid any complications in Gen-Probe's plans for commercial deployment of its  
14 NAT test kits, as of June 22, 1999 Gen-Probe obtained a license ("the License") from Vysis under  
15 the '338 patent. Gen-Probe also obtained options to the License for its relationships with Chiron  
16 and Bayer.

17 21. Under the terms of the License, Vysis requires Gen-Probe (and its allied parties if  
18 the options are exercised) to make significant financial payments to Vysis as royalties on the sale of  
19 any product covered by any valid claims of the '338 patent.

20 22. Notwithstanding the existence of the License, and as further alleged herein, Gen-  
21 Probe believes that the claims of '338 patent are invalid in all material respects. Furthermore, Gen-  
22 Probe believes that its NAT blood screening tests do not infringe any valid claim of the '338 patent.  
23 As such, Gen-Probe disagrees with Vysis' contention that the claims of the '338 patent "apply" to  
24 Gen-Probe's activities and contemplated products. For these same reasons, Gen-Probe contends  
25 that it has no obligation to make any royalty payments to Vysis with respect to its present products  
26 and activities and any contemplated products and activities that Vysis may later claim infringe the  
27 claims of the '338 patent.

28 23. Gen-Probe has communicated to Vysis its belief that the claims of the '338 patent

00533005 030800

1 are invalid. In support of that belief, Gen-Probe has provided Vysis with information that  
2 demonstrates that the claims of the '338 patent are invalid. Gen-Probe has also advised Vysis of its  
3 belief that its NAT test kits for use in detecting HCV and HIV in the Nation's blood supply do not  
4 and will not infringe any valid claims of the '338 patent.

5 24. Notwithstanding its receipt of the foregoing information, Vysis persists in its  
6 assertion that the claims of the '338 patent are valid and enforceable and that Gen-Probe is  
7 obligated to make royalty payments in accordance with the terms of the License.

8 25. Based upon a long history of litigation between Gen-Probe and Vysis and its  
9 affiliates, Gen-Probe reasonably anticipates that should it fail to pay royalties pursuant to the  
10 License, Vysis will aggressively attempt to enforce its perceived rights under both the License and  
11 the '338 patent by terminating the License and by initiating litigation against Gen-Probe, its allied  
12 parties, and customers.

13 26. An actual case or controversy exists between Gen-Probe and Vysis concerning the  
14 validity and infringement of the '338 patent and Gen-Probe's rights and obligations under the  
15 License. The determination of the issues presented in this complaint will inure to the greater public  
16 benefit and good.

17 COUNT ONE

18 NON-INFRINGEMENT OF THE '338 PATENT

19 27. Gen-Probe repeats, repleads and incorporates herein the allegations of paragraphs 1  
20 through 26 of this complaint.

21 28. Gen-Probe's NAT test kits for use in detecting HCV and HIV in the Nation's blood  
22 supply do not and will not infringe any valid claims of the '338 patent.

23 COUNT TWO

24 INVALIDITY OF THE '338 PATENT

25 29. Gen-Probe repeats, repleads and incorporates herein the allegations of paragraphs 1  
26 through 26 of this complaint.

27 30. The claims of the '338 patent are invalid by reason of one or more provisions of  
28 Title 35 of the United States Code.

COUNT THREE

DECLARATORY RELIEF

31. Gen-Probe repeats, repleads and incorporates herein the allegations of paragraphs 1 through 26 of this complaint.

32. An actual controversy has arisen and now exists concerning the rights and obligations of Gen-Probe pursuant to the terms of the parties' License. Those disputes arise from and their resolution depends upon the federal patent laws.

33. Gen-Probe seeks a declaration of its rights and obligations under the License, particularly in light of the invalidity and non-infringement of the '338 patent and defendant's acts of unfair competition as alleged herein.

COUNT FOUR

UNFAIR COMPETITION

34. Gen-Probe repeats, repleads and incorporates herein the allegations of paragraphs 1 through 33 of this complaint.

35. Vysis knows or should know the underlying facts establishing the invalidity of the claims of the '338 patent. In continuing to enforce the claims of the '338 patent, Vysis has acted and continues to act unfairly, inequitably and in bad faith. In addition, Vysis' actions constitute unlawful, unfair or fraudulent business practices under California Business & Professions Code Sections 17200, *et seq.*

36. By reason of the aforementioned acts of unfair competition and unlawful, unfair and fraudulent business practices, Gen-Probe is entitled to damages, as established at time of trial, restitution and injunctive relief.

WHEREFORE, Gen-Probe prays as follows:

- 1. For declarations:
  - a. That Gen-Probe's products do not and will not infringe any valid claims of '338 patent;
  - b. That the claims of the '338 patent are invalid; and
  - c. Of Gen-Probe's rights and obligations under the parties' License;

2. For a preliminary and permanent injunction enjoining and restraining defendant, its respective officers, agents, servants, employees and attorneys, and all persons acting in concert with them, and each of them:

a. From making any claims to any person or entity that Gen-Probe's products infringe the '338 patent;

b. From interfering with, or threatening to interfere with the manufacture, sale, license, or use of Gen-Probe's products by Gen-Probe, its allied parties, distributors, customers, licensees, successors or assigns, and others; and

c. From instituting or prosecuting any lawsuit or proceeding, placing in issue the right of Gen-Probe, its allied parties, distributors, customers, licensees, successors or assigns, and others to make, use or sell Gen-Probe's products;

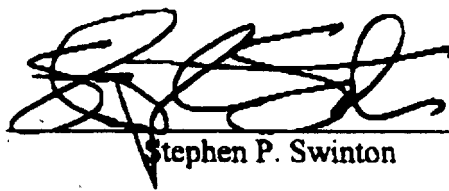

3. For recovery of Gen-Probe's damages, as proven at time of trial, and restitution of any sums by which Vysis has been unjustly enriched;

4. For recovery of Gen-Probe's attorneys' fees and costs of suit incurred herein; and

5. For such other and further relief as the Court may deem just and proper.

22 TO ALL PARTIES AND THEIR COUNSEL OF RECORD:

23       PLEASE TAKE NOTICE that on April 10, 2000, at 10:30 a.m., or as

24 soon thereafter as this matter may be heard before the Honorable

25 Marilyn Huff in Courtroom 1 of the above-entitled Court, located at

26 940 Front Street, San Diego, defendant Vysis, Inc. ("Vysis") will,

27 and hereby does, move the Court for an order staying the above-

28 captioned action, with the exception that plaintiff be required to

1 timely respond to the first set of interrogatories served by Vysis on  
2 January 26, 2000, pending completion by the United States Patent and  
3 Trademark Office ("PTO") of the reissue proceeding for United States  
4 Patent No. 5,750,338 ("the '338 patent"), the patent in suit in this  
5 action. The application for reissue of the '338 patent was filed  
6 March 8, 2000, in the PTO.

7 Alternatively, defendant Vysis will, and hereby does, move the  
8 Court under Federal Rule of Civil Procedure 12(b)(6) for an order  
9 dismissing Count Four of the First Amended Complaint in this action,  
10 which purports to state a claim for violation of California Business  
11 and Professions Code sections 17200 et seq. The grounds for this  
12 alternative motion are that Count Four fails to allege facts which  
13 state a claim upon which relief can be granted.

14 The motion for stay will be based on this notice, the attached  
15 memorandum of points and authorities, and associated exhibits, the  
16 declaration of John H. L'Estrange, Jr., the pleadings, files and  
17 records in this case, and any oral and documentary evidence that may  
18 be presented at the hearing on this motion.

1 I. INTRODUCTION

2 Effective June 22, 1999, Gen-Probe Incorporated ("Gen-Probe")  
3 took a license under Vysis', Inc.'s United States Patent No.  
4 5,750,338 ("the '338 patent"). See First Amended Complaint ¶ 20. On  
5 December 22, 1999, Gen-Probe filed a Complaint against Vysis,  
6 requesting this Court to declare the '338 patent 9 (Ex. A)<sup>1</sup> invalid  
7 and not infringed by Gen-Probe's Nucleic Acid Test "NAT" kits. On  
8 January 6, 2000 (at Vysis' request), Gen-Probe identified six  
9 technical publications that it contended invalidated the '338 patent  
10 (Ex. B). None of these publications appears to describe processes  
11 where nucleic acid targets are first separated from a patient sample  
12 and then subjected to an in vitro amplification process where many  
13 copies of each target molecule are made. This was the focus of all  
14 of the examples of the '338 patent, and of the United States Patent  
15 and Trademark Office ("PTO") in deciding to issue the '338 patent.  
16 It is also an essential feature of Gen-Probe's "NAT" test kits. On  
17 January 19, 2000, Vysis (at Gen-Probe's request) informed Gen-Probe  
18 that it would answer the Complaint in this action (Ex. C).

19 In response, on January 25, 2000, Gen-Probe filed a First  
20 Amended Complaint again requesting the Court to declare the '338  
21 patent invalid and not infringed by Gen-Probe's NAT test kits, and,  
22 additionally, to declare Gen-Probe's rights and obligations under the  
23 License between Gen-Probe and Vysis pertaining to the '338 patent  
24 (pertinent portions of which are attached as Ex. D), and charging  
25 Vysis with unfair competition and violation of Cal. Bus. & Prof. Code  
26 § 17200 et seq. See First Amended Complaint, Count Four.

27  
28 <sup>1</sup>All exhibits referred to in this memorandum are attached to and  
authenticated by the Declaration of John H. L'Estrange, Jr. filed this same  
date.

1 In an effort to secure a speedy, inexpensive and just resolution  
2 of the patent validity issues raised by Gen-Probe, Vysis filed on  
3 March 8, 2000, an application with the PTO to reissue the '338 patent  
4 under 35 U.S.C. § 251 (Ex. E). Vysis identified the publications  
5 cited by Gen-Probe for the PTO so that their effect, if any, on the  
6 existing claims may be determined. Additionally, Vysis has presented  
7 narrower claims that clearly avoid Gen-Probe's publications yet still  
8 clearly cover Gen-Probe's products.

9 As more fully set forth in Section II below, this action should  
10 be stayed pending the outcome of the reissue proceedings<sup>2</sup> so that the  
11 Court and the parties may have the benefit of the PTO's views on the  
12 issues raised by Gen-Probe and so that any newly issued patent claims  
13 can be made a part of this action.

14 Alternatively, for reasons noted in Section III below, Gen-  
15 Probe's claim for unfair competition should be dismissed under Fed.  
16 R. Civ. P. 12(b)(6) as failing to state a claim upon which relief can  
17 be granted. If the motion for a stay is granted the Rule 12(b)(6)  
18 motion to dismiss Count Four may be deferred until after the stay is  
19 vacated by the Court.  
20  
21  
22  
23  
24  
25

---

26 <sup>2</sup>Reissue is essentially a reprosecution of the patent. The patentee may  
27 include for examination in the reissue application: (i) unchanged, original  
28 claims; (ii) new, narrower claims; and (iii) if the reissue is filed within two  
years of the grant of the patent, new, broader claims. A reissue application is  
examined in the same manner as original applications; original claims may  
therefore be rejected, and new claims may be allowed. See 35 U.S.C. § 1.176.

1 II. THE LITIGATION SHOULD BE STAYED PENDING RESOLUTION OF REISSUE  
2 PROCEEDINGS FOR THE '338 PATENT

3 Gen-Probe alleges that the '338 patent is invalid. Specifically,  
4 at paragraph 23 of its First Amended Complaint, Gen-Probe asserts  
5 that:

6 23. Gen-Probe has communicated to Vysis its belief  
7 that the claims of the '338 patent are invalid. In  
8 support of that belief, Gen-Probe has provided Vysis  
with information that demonstrates that the claims of  
the '338 patent are invalid.

9 Vysis believes that the information that Gen-Probe has cited  
10 does not invalidate the '338 patent. However, in the interests of  
11 judicial economy, Vysis has requested the PTO to reissue the '338  
12 patent. Specifically, Vysis has asked the PTO to allow additional,  
13 narrower claims, which clearly avoid the art cited by Gen-Probe and  
14 which still cover Gen-Probe's activities. In doing so, the PTO will  
15 review the '338 patent in view of the information which Gen-Probe has  
16 provided to Vysis. To avoid substantial duplication of effort in  
17 determining the patent's validity, and to avoid potentially wasted  
18 investment in analyzing claims for infringement (a) which may or may  
19 not be altered during reissue, and (b) which may come into existence  
20 only following the reissue process, Vysis moves this court to stay  
21 the litigation proceedings pending the outcome of the reissue  
proceedings in the PTO.

22 Granting a stay is well within the Court's discretionary power  
23 to manage its docket. *Ethicon, Inc. v. Quigg*, 849 F.2d 1422, 1426-27  
24 (Fed. Cir. 1988) Courts routinely grant stays during reissue  
25 applications for just this purpose. *Clintec Nutrition Co. v. Abbott*  
26 *Labs.*, No. 94-C3152, 1995 WL 228988, at \*6 (N.D. Ill. Apr. 14, 1995)  
27 (motion to stay pending outcome of reissuance proceedings granted);  
28 see also *ASCII Corp. v. STD Entertainment USA, Inc.*, 844 F. Supp.

1 1378, 1380-81 (N.D. Cal. 1994) (The court has the inherent ability to  
2 grant a stay of proceedings; motion to stay pending outcome of  
3 reexamination or reissue proceedings granted).

4 In deciding a motion to stay, courts generally consider: (a)  
5 whether doing so would cause undue prejudice or present a clear  
6 tactical disadvantage to the non-moving party (ASCII, 844 F.Supp. at  
7 1380); and (b) whether the stay will result in a simplification or a  
8 complication of the issues, proof and questions of law (Clintec, 1995  
9 WL at \*1 (citing, *Teradyne, Inc. v. Hewlett-Packard Co.*, No. 91-C-  
10 0344, 1993 U.S. Dist. LEXIS at \*21 (N.D. Cal. Jan. 7, 1993)). In this  
11 matter, the Court's consideration of whether to grant a stay should  
12 also be informed by the terms and purposes of the Declaratory  
13 Judgment Act. See *United Sweetener USA, Inc. v. Nutrasweet Co.*, 766  
14 F.Supp. 212, 215-16 (D. Del. 1991). All factors weigh in favor of a  
15 stay.

16 **A. A Stay Would Not Cause Undue Prejudice To Gen-Probe**

17 A stay would not cause undue hardship because (a) little  
18 investment has been made by either party in this litigation; (b)  
19 reissue proceedings are "special" (*Manual of Patent Examining  
20 Procedure* (hereinafter "MPEP"), § 1442) and thus the PTO expedites  
21 their processing (MPEP § 1442,03); and (c) Gen-Probe can file a  
22 protest in the PTO expressing its views on the validity of the '338  
23 patent (37 C.F.R. § 1.291).

24 With respect to the interest of the parties in the current  
25 litigation, the action is barely a few months old, Vysis has not  
26 answered the complaint, there has been no Early Neutral Evaluation  
27 Conference, neither party has responded to discovery requests, a pre-  
28 trial order has not been submitted and will not be submitted for some  
time, and a trial date has not been set. See ASCII, 844 F.Supp at

1 1381 (no undue prejudice and motion to stay granted where parties  
2 were only in initial stages of lawsuit, undertaken little or no  
3 discovery, and case had not been set for trial); *Dennco, Inc. v.*  
4 *Cirone*, No. 94-455-SD (no undue prejudice and motion to stay granted  
5 where the parties were in the initial stages of the lawsuit and had  
6 undertaken little or no discovery); *Clintec*, 1995 WL, at \*3 (no undue  
7 prejudice and motion to stay granted where suit was filed about one  
8 year prior, two depositions had been taken, some paper discovery had  
9 occurred, but no trial date was set).

000000000000000000

10 Reissue proceedings would not cause undue hardship for the  
11 further reason that the PTO expedites the processing of such  
12 applications, placing great emphasis on the expedited processing of  
13 reissue applications which are the subject of a stayed litigation.  
14 MPEP § 1442.03. All reissue applications are taken up "special", and  
15 are also taken up ahead of all other "special" applications. MPEP §  
16 1442. Special applications are responded to immediately. *Id.*  
17 Finally, unlike other applications for which applicants have up to  
18 six months to respond to PTO actions, reissue applicants only receive  
19 one month to respond to PTO actions and this time period may be  
20 extended only upon a showing of clear justification. MPEP § 1442.01;  
21 37 C.F.R. 1.136(b). Finally, grant of stay pending resolution of the  
22 reissue proceedings will not cause undue prejudice because Gen-Probe  
23 can provide the PTO with its view on the validity of the '338 patent  
through an appropriate protest. 37 C.F.R. § 1.291; MPEP § 1901.

28 / / /

1 B. A Stay Would Result In A Simplification

2 Of The Issues, Proof, And Questions Of Law

3 A stay would serve the interests of judicial economy. Patent  
4 validity, a core issue in the reissue proceeding, is also a central  
5 issue in this litigation. Grant of a stay would serve the interests  
6 of judicial economy by preventing the substantial duplication of  
7 effort that would occur if this case proceeded conjunctively with the  
8 reissue proceeding. See *GPAC, Inc. v. D.W.W. Enterprises, Inc.*, 144  
9 F.R.D. 60, 64, (D.N.J. 1992). In addition, by shifting to the PTO  
10 the initial decision on patent validity, the outcome of the reissue  
11 proceeding would facilitate settlement without further use of the  
12 court. See *id.*; *United Merchants Mfrs., Inc.*, 495 F.Supp.444,447  
13 (N.D.Ga. 1980); *Fisher Controls Co., Inc. v. Control Components,*  
14 *Inc.*, 443 F.Supp. 581, 582 (S.D. Iowa 1977) At worst, the litigation  
15 would proceed afterwards with the court having the benefit of the  
16 PTO's expertise in evaluating validity in view of prior art  
17 references. In this regard, a stay will minimize the prospect of the  
18 Court having to deal with validity defenses that have not been  
19 initially passed upon by the PTO. See *GPAC*, 144 F.R.D. at 65; see  
20 also *ASCII*, 844 F.Supp. at 1381 ("[T]he court concludes that ASCII  
21 should be given the opportunity to file an application for  
22 reexamination and/or reissue, since the USPTO's expertise may assist  
23 both the parties and the court. . . ."); *Gould v. Control Laser*  
24 *Corp.*, 705 F.2d 1340, 1342 (Fed. Cir. 1983) ("One purpose of the  
25 reexamination [or reissue] procedure is . . . to facilitate trial of  
26 [validity] by providing the district court with the expert view of  
the PTO. . . .").

27 Additional benefits of a stay which courts have recognized, and  
28 are applicable to the case at hand, include: (a) Many discovery

1 problems relating to the prior art can be alleviated by the PTO  
2 examination; (b) The record of reissue would likely be entered at  
3 trial, thereby reducing the complexity and length of the litigation;  
4 (c) Issues, defenses, and evidence will be more easily limited in  
5 pre-trial conferences after a reissue; and (d) The cost will likely  
6 be reduced both for the parties and the court. See *GPAC*, 144 F.R.D.  
7 at 63; *Clintec*, 1995 WL, at \*2; *United Merchants and Mfrs.*, 495  
8 F.Supp. at 447; *Fisher Controls Co., Inc.*, 443 F.Supp. at 582.

9 **C. A Stay Is Particularly Appropriate**

10 **In A Declaratory Judgment Proceeding**

11 The Declaratory Judgment Act is an authorization for  
12 jurisdiction, not a command. *United Sweetener*, 766 F.Supp. at 216  
13 (quoting *Erbamont, Inc. v. Cetus Corp.*, 720 F.Supp. 387, 392 (D. Del.  
14 1990)). Under the Act, courts should refuse to proceed if they find  
15 that a declaratory judgment action will not serve a useful purpose or  
16 is otherwise undesirable. *United Sweetener*, 766 F.Supp. at 216  
17 (quoting *Erbamont, Inc. v. Cetus Corp.*, 720 F.Supp. 387, 392 (D. Del.  
18 1990)). In determining the appropriateness of a declaratory judgment  
19 action, courts should consider whether such an action would clarify  
20 and settle the legal relations in issue, and whether such an action  
21 would terminate and afford relief from the uncertainty, insecurity,  
22 and controversy giving rise to the action.

23 As discussed above, staying this litigation in favor of the PTO  
24 proceedings would simplify issues and evidence and may moot the  
25 litigation altogether by promoting settlement. Accordingly, it would  
26 be entirely consistent with the discretionary nature of declaratory  
27 judgment jurisdiction to condition the exercise of that jurisdiction  
28 on a stay pending completion of the reissue proceedings.

1 In this regard, Vysis respectfully requests that Gen-Probe be  
2 ordered to timely answer Vysis' First Set of Interrogatories, served  
3 January 26, 2000, (Ex. F), notwithstanding the entry of the stay.  
4 Those interrogatories simply seek the bases for Gen-Probe's  
5 allegations of invalidity and noninfringement. The answers are  
6 necessary for the Court and the parties to gain the full benefit of  
7 the reissue proceedings. Gen-Probe's letter informing Vysis of the  
8 publications allegedly invalidating the '338 patent explicitly stated  
9 that there are other such materials of which Gen-Probe is aware (Ex.  
10 B). If there are additional validity or claim interpretation issues  
11 now known to Gen-Probe, Gen-Probe should identify them so that the  
12 PTO's reissue procedures can be as complete as possible. The  
13 discovery request was timely served and, but for Gen-Probe's request  
14 for an extension of time to answer in exchange for the extension  
15 granted Vysis to respond to the amended complaint, would already have  
16 been answered.<sup>3</sup>

17 **III. THE UNFAIR COMPETITION CLAIM SHOULD BE**  
18 **DISMISSED UNDER FEDERAL RULE OF**  
19 **CIVIL PROCEDURE 12(b)(6)**

20 Vysis respectfully moves the Court, in the alternative, for an  
21 order dismissing Gen-Probe's unfair competition allegations set forth  
22 in Count Four of the First Amended Complaint for failure to state a  
23 claim for which relief can be granted. Fed. R. Civ. P. 12(b)(6).  
24 The alleged act of unfair competition is stated in paragraph 35 of  
25 the First Amended Complaint as follows:

26 35.Vysis knows or should know the underlying facts  
27 establishing the invalidity of the claims of the '338  
28 patent. In continuing to enforce the claims of the '338

---

<sup>3</sup>This Court's Order dated February 8, 2000, requires Gen-Probe to respond  
by March 27, 2000.

1 patent, Vysis has acted and continues to act unfairly,  
2 inequitably and in bad faith. In addition, Vysis' actions  
3 constitute unlawful, unfair or fraudulent business  
practices under California Business & Professions Code  
Sections 17200, et seq.

4 The apparent antecedent for the acts of "continuing to enforce  
5 the claims of the '338 patent" is stated in paragraphs 23 and 24 as  
6 follows:

7 23. Gen-Probe has communicated to Vysis its belief that  
8 the claims of the '338 patent are invalid. In support of  
9 that belief, Gen-Probe has provided Vysis with information  
10 that demonstrates that the claims of the '338 patent are  
invalid. Gen-Probe has also advised Vysis of its belief  
that its NAT test kits for use in detecting HCV and HIV in  
the Nation's blood supply do not and will not infringe any  
valid claims of the '338 patent.

11 24. Notwithstanding its receipt of the foregoing  
12 information, Vysis persists in its assertion that the  
13 claims of the '338 patent are valid and enforceable and  
that Gen-Probe is obligated to make royalty payments in  
accordance with the terms of the License.

14 Gen-Probe does not allege that the license contract is not a  
15 valid contract. The contract provides that royalties shall be paid  
16 unless and until a licensed patent claim is declared invalid in a  
17 final decision from a tribunal of competent jurisdiction. This is in  
18 accord with the substantive patent law, which provides that (a) a  
19 patent is presumed valid (35 U.S.C. § 282); (b) the party asserting  
20 invalidity has the burden of proving that the patent is invalid by  
21 clear and convincing evidence (*Ryco Inc. v. Ag-Bag Corp.* 857 F.2d  
22 1418, 1423 (Fed. Cir. 1988)); and (c) a licensee wishing to retain  
23 the benefits of a patent license must continue to pay royalties until  
24 the presumptively valid patent is declared invalid (*Cordis Corp. v.*  
25 *Medtronic, Inc.*, 780 F.2d 991, 994-95 (Fed. Cir. 1985)). Thus,  
26 Vysis' alleged persistence in its belief that the patent remains  
27 valid and enforceable and that Gen-Probe is obligated to make royalty  
28 payments in accordance with the terms of the license is simply

1 declaratory of Gen-Probe's obligations under a valid contract.  
2 Section 17200 cannot convert activity authorized by law into a tort.  
3 *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co.*, 20  
4 Cal.4th 163, 182 (1999).

5 Moreover, the license contract may be terminated unilaterally by  
6 Gen-Probe in accordance with the terms of the agreement (Ex. D).  
7 Vysis cannot, therefore, be forcing Gen-Probe to be a licensee or to  
8 perform any of the obligations under the license contract.

9 If the asserted invalidity or noninfringement of the '338 patent  
10 is as clear as Gen-Probe would have this Court believe, Gen-Probe may  
11 terminate the license, thereby freeing itself from its royalty  
12 obligations thereunder. If, on the other hand, the outcome of its  
13 declaratory judgment action on validity and infringement of the '338  
14 patent is sufficiently unclear that Gen-Probe wishes to maintain its  
15 rights under the license in the event of an adverse judgment, then  
16 the continued existence of the license agreement, with the associated  
17 obligation to abide by its terms, can hardly constitute an act of  
18 unfair competition. The decision of whether or not to remain a  
19 licensee is entirely Gen-Probe's. Gen-Probe cannot blame Vysis for  
20 the logical consequences of Gen-Probe's unilateral decision to remain  
21 a licensee.

22 Finally, if Gen-Probe is implying that Vysis' decision to defend  
23 itself in this lawsuit is the act of "enforcement" constituting  
24 unfair competition, this action is specifically authorized under the  
25 litigation privilege of California Civil Code § 47(b) and cannot,  
26 therefore, constitute unfair competition. *Cel-Tech*, 20 Cal.4th at  
27 182-3 (referring to *Rubin v. Green*, 4 Cal.4th 1187 (1993)); see also  
28 *California Physicians' Service v. Superior Court*, 9 Cal.App.4th 1321,  
1325 (1992) ("[t]here is no tort of 'malicious defense.' The

1 mainstay supporting this principle is the absolute privilege  
2 contained in Civil Code section 47, subdivision (b).") (1992). The  
3 only exception to California's litigation privilege under Section  
4 47(b) is malicious prosecution. Rubin, 4 Cal.4th at 1193-94,  
5 However, Gen-Probe cannot allege malicious prosecution for at least  
6 two reasons. First, Vysis is defending this action, not prosecuting  
7 it, and as noted, no tort for "malicious defense" exists. *Triplett*  
8 *v. Farmers Ins. Exchange*, 24 Cal.App.4th 1415, 1422 (1994). Second,  
9 to prove malicious prosecution, Gen-Probe needs to show favorable  
10 termination of the underlying action, which it cannot do, or even  
11 plead, prior to resolution of its declaratory judgment action on the  
12 patent validity and liability issues.

13 In view of the foregoing, Gen-Probe's unfair competition claims  
14 should be dismissed under Fed. R. Civ. P. 12(b)(6) for failure to  
15 state a claim upon which relief can be granted.

16 **IV. CONCLUSION**

17 For the reasons discussed above, Vysis respectfully requests  
18 that this Court grant its motion to stay in this litigation, pending  
19 the outcome of the reissue proceedings at the PTO (with the exception  
20 that Gen-Probe be required to timely respond to the first set of  
interrogatories served by Vysis); and, alternatively, to dismiss

21 I, John H. L'Estrange, Jr., declare as follows:

22 1. I am a member in good standing of the state bar of  
23 California, and a partner in the law firm Wright & L'Estrange,  
24 counsel for Defendant Vysis, Inc. ("Vysis") in the above-captioned  
25 proceeding. I make this declaration, based on information and  
26 belief, in support of the motion by Vysis for a stay of proceedings  
27 and, alternatively, to dismiss Count Four of the First Amended  
28 Complaint pursuant to Federal Rule of Civil Procedure 12(b)(6).

2. Attached hereto as Exhibit A is a true and correct copy of United States Patent No. 5,750,338 ("the '338 patent")

3. Attached hereto as Exhibit B is a true and correct copy of a letter dated January 6, 2000, from Peter Shearer, Vice President for Intellectual Property for Gen-Probe Incorporated to Norval Galloway, counsel for Vysis.

4. Attached hereto as Exhibit C is a true and correct copy of a letter dated January 19, 2000, from Norval Galloway, to Peter Shearer.

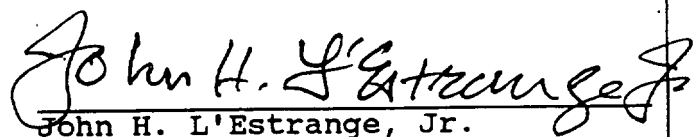

5. Attached hereto as Exhibit D is a redacted copy of the license agreement which is alleged in paragraph 20 of the First Amended Complaint in the above captioned action.

6. Attached hereto as Exhibit E a true and correct copy of the application to the United States Patent and Trademark Office ("PTO") filed to reissue the '338 patent. This application was filed with the PTO on March 8, 2000.

7. Attached hereto as Exhibit F is a true and correct copy of the first set of interrogatories personally served by Vysis on Gen-Probe on January 26, 2000. The stipulated order of this court dated February 8, 2000, provides that Gen-Probe's responses to Vysis' first set of interrogatories are due on or before March 27, 2000.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge, information and belief.

Executed this 9th day of March, 2000, at San Diego, California.

  
John H. L'Estrange, Jr.
